

iBook

More power. More memory. Even more colours. It could only be the next generation of iBook, the computer that set a new standard for notebooks. Now iBook gives you more choices than ever in a great-looking, great-performing design.

iBook. It's iMac to go.

iBook

Features

Stunning style designed to go where you go

- Striking shape designed for easy carrying—now in a choice of three eye-catching colours
- Brilliant high-resolution TFT active-matrix display
- Convenient fold-away handle
- Unique closing mechanism with no latches to break

Impressive performance, low price

- 300- or 366-MHz PowerPC G3 processor with performance-boosting backside level 2 cache
- Up to 6 hours of battery life on a single charge*
- ATI RAGE Mobility graphics controller with 4MB of SDRAM video memory for 2D and 3D graphics acceleration, enhanced QuickTime movie playback, and games
- Built-in high-speed Ethernet networking and 56K modem**

Quick, easy access to the Internet

- Setup Assistant gets you on the Internet in minutes
- Preinstalled Internet software for browsing the web and sending and receiving e-mail
- High-speed AirPort wireless networking option gives you the freedom to surf the Internet from anywhere in your home or classroom
- Programmable function keys let you open your browser, e-mail, or favourite application with a single keyclick

Easy setup and use

- The Mac OS provides you with the world's easiest-to-use system software
- Preinstalled applications let you begin working and playing right away
- Interactive tutorials help you get started with your new computer
- Comprehensive online help is available whenever you need it

* Depending on configuration and use.

** Actual modem speeds lower: speed depends on connection rate and other factors.

Now there's even more to love about iBook, with twice the memory, twice the memory expandability, and nearly twice the hard disk capacity as before. All on top of the blazing speed, dazzling design, and fast, easy access to the Internet that have made the iBook so popular already. In addition to the delectable Tangerine and Blueberry colours, you can now get the new iBook Special Edition, which offers even more power and a beautiful Graphite colour.

The award-winning iBook design includes exceptional attention to details you need in a mobile computer. The convenient foldaway handle makes it easy to take iBook wherever you go. There are no doors or latches on the edges that could get caught and damaged when you're carrying it around in your hands, your backpack, or your car. And with up to 6 hours between charges to its lithium-ion battery, the iBook is perfect for a full day in class or on the road.*

Open up the computer, and you'll enjoy the brilliance of a 12.1-inch TFT active-matrix colour display. It's driven by a PowerPC G3 processor that runs at 300 megahertz in the Tangerine and Blueberry models, and 366 megahertz in the iBook Special Edition. All models now have 64 megabytes of memory built in, and you can expand that to as much as 320 megabytes. Also inside are a 6-gigabyte hard disk drive, a built-in CD-ROM drive, and a high-performance ATI RAGE Mobility graphics accelerator.

Want to start exploring the Internet right away? It couldn't be easier, because iBook has all the hardware and software you need, including a built-in 56K modem and 10/100BASE-T Ethernet.** You also get Microsoft Internet Explorer, Netscape Communicator software, and Microsoft Outlook Express.

Apple's new AirPort technology makes it easy to surf the Internet without wires from almost anywhere in your home, school, or office. Just add the optional AirPort Card to your iBook; connect an AirPort Base Station to your phone line, cable modem, DSL modem, or Ethernet network; and you're free to work and play up to 150 feet from the base station. Multiple users can share an AirPort Internet connection simultaneously. You can also exchange files directly with other users on your AirPort network.

So choose your favourite colour and start enjoying great performance wherever you need it. iBook: It's iMac to go.

Technical Specifications

Processor and memory

- 300- or 366-MHz PowerPC G3 processor
- 512K backside level 2 cache
- 66-MHz system bus; 66-MHz memory bus
- Integrated floating-point unit and 64K on-chip level 1 cache (32K data and 32K instruction)
- 64MB of SDRAM; single 1.25-inch standard SO-DIMM slot (3.3 volt, PC66 compliant) supports up to 1.35-inch 256MB SO-DIMM for a total of 320MB of SDRAM

Storage

- 6GB Ultra ATA hard disk drive
- Built-in 24x-speed (maximum) CD-ROM drive

Display

- 12.1-inch (diagonal) built-in TFT SVGA active-matrix display
- Supports millions of colours at 800- by 600-pixel resolution
- Supports resolution scaling to 640- by 480-pixel resolution with millions of colours

Graphics support

- 4MB of SDRAM video memory
- Built-in 2D/3D graphics acceleration through an integrated ATI RAGE Mobility graphics controller with AGP 2X

Connectivity

- One 12-Mbps Universal Serial Bus (USB) port for USB devices such as printers, storage devices, keyboard, mouse, and USB hubs
- Power adaptor port

Communications

- Built-in 10/100BASE-T Ethernet (RJ-45 connector)
- Built-in 56K V.90 modem (RJ-11 connector)*
- Optional 11-Mbps AirPort wireless networking card (IEEE 802.11 DSSS compliant)

Sound

- 16-bit CD-quality stereo sound output minijack
- Single built-in mono speaker

Battery

- 45-watt-hour lithium-ion
- Up to 6 hours of battery life on a single charge, depending on configuration and usage

Keyboard

- Built-in full-size keyboard with 76 (U.S.) or 77 (ISO) keys, including 12 function keys, 4 arrow keys (inverted "T" arrangement), and embedded keypad

Apple trackpad

- Solid-state trackpad provides precise cursor control; supports tap, double-tap, and drag capabilities

Electrical requirements

- Line voltage: 100V to 240V AC
- Frequency: 50 to 60 Hz
- EPA ENERGY STAR compliant

Environmental requirements

- Operating temperature: 50° to 95° F (10° to 35° C)
- Storage temperature: -13° to 140° F (-25° to 60° C)
- Relative humidity: 20% to 80% noncondensing
- Operating altitude: 0 to 3,048 m (0 to 10,000 feet)
- Maximum storage altitude: 4,572 m (15,000 feet)

Size and weight

- Width: 13.5 inches (34.4 cm)
- Height: 11.6 inches (29.4 cm)
- Average depth: 1.8 inches (4.6 cm); depth ranges from 1.24 inches (3.15 cm) at the thinnest point to 2.06 inches (5.2 cm) at the thickest point
- Weight: 6.6 pounds (3.0 kg)

*Actual modem speeds lower; speed depends on connection rate and other factors.
